

# eProphet EDC

## Electronic Data Collection

Collect, analyse and report essential strategic information from multiple **eProphet.NET** systems to guide your business decisions, help maintain profitability focus and assist with future strategic planning.

## Overview

eProphet EDC extracts sales, labour and stock control information from each of your individual restaurant eProphet.NET systems. The system then automatically transmits this data securely to an offsite web server managed by Abcom. The data extracted from the separate locations are then assembled in a consolidated format and integrated into a comprehensive EDC database. Reports are then generated from this information and emailed to you.

## Features

- > Easy to operate. No data entry is required at store level by managers. The EDC system is operated by a simple point and click of the mouse.
- > The data from the stores is securely transmitted via broadband data links to the EDC network on a daily basis.
- > Uploads sales and labour statistics and inventory and product mix information into a database for future analysis and reporting.
- > Includes the option to have user-defined reports and graphs. (These can be customised to the user's specifications)
- > Provides multi-store reporting of key information, usually on one easy-to-read page.

## Technical Aspects

Reports are supplied in PDF format

## Benefits

**CONSOLIDATION.** Multiple store reporting on one page gives the owner/operator an easy-to-read snapshot of their business.

**SAVES YOU TIME.** With the EDC hosting services, you have no need to be involved in the preparation and administration of the system. You only have to check your email each morning.

**IMMEDIATE RESULTS.** The daily email facility ensures the Owner/Operator and Supervisors have key business indicators supplied to them automatically at the time they require it, without ringing the stores or going to the office.

**TIMELY INFORMATION.** Provides the timely delivery of key business information ensuring that action can be taken promptly to address any areas of the business that needs attention.

**SAVE ON ADMINISTRATION COSTS.** Eliminates the need for administration staff to collect, collate and present data in other forms such as spreadsheets, thereby saving time and most importantly, improving the accuracy of the information.

**VIEW YOUR REPORTS ON ANY PC.** With the reports in PDF format you can view your reports on any PC that can view a web/internet page. This means when you are on your holidays you can visit any Internet café or use your own laptop from your hotel room to view your current KPI's.

**IN-DEPTH ANALYSIS.** Detailed analysis equips the Owner/Operator with all the necessary information for controlling your business and making key strategic decisions for the future.

**FLEXIBLE AND CUSTOMISABLE.** Provides the flexibility of presenting business data in the form required by the Owner/Operator through use of the user defined reports and graphs.
